CAE**Rise Analytics**

**Harness the power of analytics with quality insights to elevate your training experience.**

CAE Rise™ Analytics provide training intelligence that enables effective data-driven decision making to elevate training standards and effectively mitigate training deficiencies. Based on assessment of indicators and metrics, the insights allow to determine tailored training program needs.

A Rise Analytics subscription will be able to add value to your training and flight operations analytics in three ways.

## Main Features

Performance Analytics Portal & Dashboards

This allows the operator to identify problematic training areas and the cause of the exceedances within those areas by breaking down the aspects of each task and showing where the pilot needs to improve.

Training Insights from Objective Simulator Data

CAE Rise™ Analytics uses objective telemetry data to measure the collective pilot performance.

This helps the instructor and operator determine how pilots perform and evolve during their training and it establishes a benchmark that allows the heads of training to compare their pilots' performance relative to industry standards.

CAE

Main Features

eGrading Insights

CAE Rise™ Analytics gives the operator a
detailed look at all the recorded grading data,
which helps identify how instructors grade their
pilots on a particular task or training event.
