GENERAL NAVIGATION

Context Filters

## Context Filters

CAE Rise Analytics gives you the capability to use context filters to find the desired data based on the parameters of your choice. To learn more about context filters, refer to the content below.

**1 Aircraft Type**

The *Aircraft Type* filter allows you to select one of various platforms (aircraft) for the data you'd like to view by clicking on the drop-down menu and making a selection.

**4 More Filters**

Click on the *All Filters* button to reveal the Filters menu.

**2 Training Program**

The *Training Program* filter allows you to choose between Recurrent or Initial training data by clicking on the drop-down menu and making a selection.

**3 Analysis Time Frame**

The *Analysis Time Frame* filter lets you establish the time frame for the data you would like to see by clicking on the drop-down menu and setting the date range.

## Context Filters

CAE Rise Analytics gives you the capability to use context filters to find the desired data based on the parameters of your choice. To learn more about context filters, refer to the content below.

### 5 Filters Menu

The *Filters* menu is where you can choose which filters to apply to tailor the data to your liking.
