Adding Indications

## Adding Indications

Unlike tasks, indications are guidelines, reminders and helpful hints directed to the instructor to help them throughout the lesson. Indications work in conjunction with tasks to ensure that nothing is missed.

To learn more about adding indications, review the information below.

The screenshot shows the 'Test Lesson 001' interface. The left sidebar contains navigation options: Dashboard, Courses, Lessons, Modules, Tasks, Change Requests, and Customers. The main content area displays the lesson details, including the title 'Test Lesson 001', a 'DRAFT' status, and metadata. Below this is the 'Plan Of Action' section, which contains two tasks. The right-hand panel shows the 'Indications' tab, which is highlighted with a yellow circle containing the number '1'. The 'Indications' list includes: ATIS (automatic airport weather and info sent on VHF), ATC (communication with ATC, air traffic controllers, simulated), COMP (communication with the Company's maintenance or operational department via WIFI), and CAB (indicates any communication from Cabin Crew to Flight Deck).

The screenshot shows the 'Test Lesson 001' interface. The left sidebar contains navigation options: Courses, Lessons, Modules, Tasks, Change Requests, Customers, and Administration. The main content area displays the lesson details, including the title 'Test Lesson 001', a 'DRAFT' status, and metadata. Below this is the 'Plan Of Action' section, which contains three tasks. The right-hand panel shows the 'Indications' tab, which is highlighted with a yellow circle containing the number '1'. The 'Indications' list includes: ATIS (automatic airport weather and info sent on VHF), ATC (communication with ATC, air traffic controllers, simulated), COMP (communication with the Company's maintenance or operational department via WIFI), CAB (indicates any communication from Cabin Crew to Flight Deck), ENV (indicates weather and conditions to be set on IOS by Instructor, such as Runway friction, Darkness, Rain, Lightning etc.), and MALF (indicates a malfunction to be inserted by Instructor). A yellow circle with the number '3' is placed over the 'Administration' link in the left sidebar.

### 1 Viewing Indications

To view the indications, click on the *Indications* link located next to the *Tasks* link to view all available indications.

### 2 Selecting an Indication

Once the available indications appear, you can choose one from the list and drag it to the plan of action under the desired task.

### 3 Indication Added to POA

Once the indication has been added, the only edits that can be made (after clicking on the blue arrow) are to the indication's title and description.
