Adding Malfunction Tasks

Adding Malfunction Tasks

As part of a module, trainees will need to complete malfunction tasks to fulfill their training requirements.

To learn more about adding malfunction tasks, review the information below.

1 Viewing Malfunction Tasks

To view malfunctions tasks, click the *Malfunction* button and all the available malfunction tasks will appear.

Selecting a Task

Once the malfunction task list appears, you can choose the malfunction task you'd like to add to the plan of action by simply dragging the task to the POA area.

Just like other tasks, you'll have to enter the allotted time for the task and click on the blue arrow to edit the task's details.
