Editing a Module

## Editing a Module

Once you've created a module, you will need to add various tasks to that module in order for it to be complete.

To learn more about editing a module, review the information below.

The image displays two screenshots of the CAE system interface for editing a module. The top screenshot shows the 'Test Module 001' details page with the 'EDIT' button highlighted by a yellow circle labeled '1'. The bottom screenshot shows the 'Plan of Action' section with a dashed box for dragging tasks, a search bar with a yellow circle labeled '4', and a list of tasks with a yellow circle labeled '5' pointing to the first task. A yellow circle labeled '2' points to the 'Plan of Action' dropdown, and a yellow circle labeled '3' points to the 'Tasks' link.

### 1 Module to Edit

Click on the module you'd like to edit to open it and click on the **EDIT** button.

### 4 Search Feature

In order to find the exact task that you are looking for, you can use the search feature and add the right keywords to find what you're looking for.

### 2 Plan of Action (POA)

The plan of action is essentially a lesson plan where all the tasks will be located and presented in the order you determine.

### 5 Available Tasks

The task menu is where you'll find all the available tasks that can be added to the plan of action. To add a task, simply drag the task from the list and drop it into the POA.

### 3 Tasks Link

The task link will give you access to the tasks.
