Adding Indications

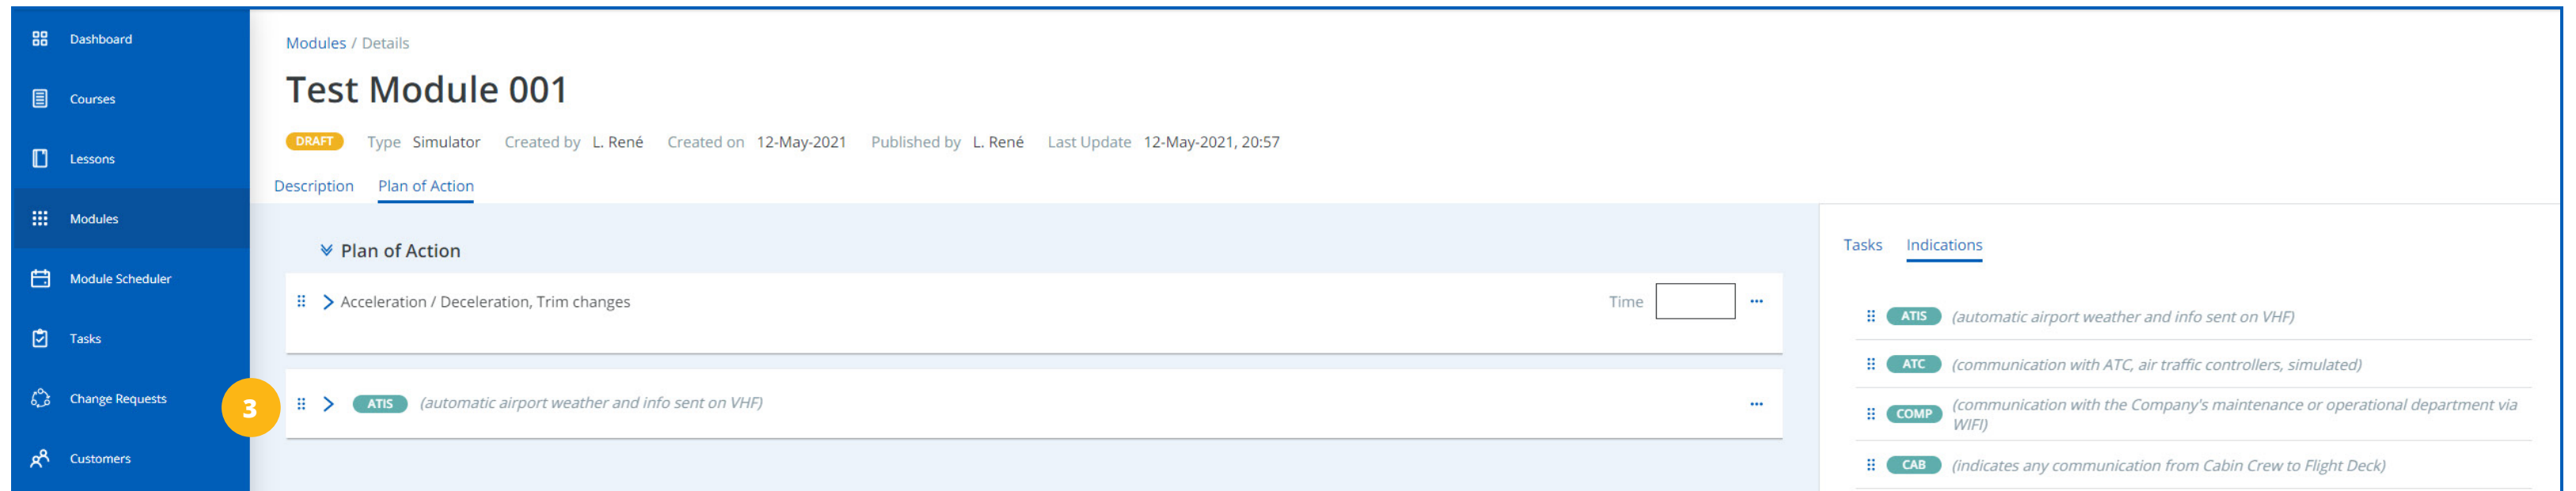

Adding Indications

Unlike tasks, indications are guidelines, reminders and helpful hints directed to the instructor to help them throughout the module. Indications work in conjunction with tasks to ensure that nothing is missed.

To learn more about adding indications, review the information below.

The screenshot shows the CAERISE Editor interface for 'Test Module 001'. The left sidebar contains navigation options: Dashboard, Courses, Lessons, Modules, Module Scheduler, and Tasks. The main content area displays the module details, including a 'DRAFT' status, type 'Simulator', and creation information. The 'Plan of Action' section is expanded, showing a task: '> Acceleration / Deceleration, Trim changes'. A 'Time' input field is visible next to the task. On the right, the 'Indications' tab is selected, showing a list of indications: ATIS (automatic airport weather and info sent on VHF), ATC (communication with ATC, air traffic controllers, simulated), COMP (communication with the Company's maintenance or operational department via WIFI), and CAB (indicates any communication from Cabin Crew to Flight Deck). A yellow circle with the number '1' highlights the 'Indications' link in the top right corner.

The screenshot shows the CAERISE Editor interface for 'Test Module 001'. The left sidebar contains navigation options: Dashboard, Courses, Lessons, Modules, Module Scheduler, Tasks, Change Requests, and Customers. The main content area displays the module details, including a 'DRAFT' status, type 'Simulator', and creation information. The 'Plan of Action' section is expanded, showing a task: '> Acceleration / Deceleration, Trim changes'. A 'Time' input field is visible next to the task. On the right, the 'Indications' tab is selected, showing a list of indications: ATIS (automatic airport weather and info sent on VHF), ATC (communication with ATC, air traffic controllers, simulated), COMP (communication with the Company's maintenance or operational department via WIFI), and CAB (indicates any communication from Cabin Crew to Flight Deck). A yellow circle with the number '2' highlights the 'ATIS' indication being dragged into the 'Plan of Action' section.

1 Viewing Indications

To view the indications, click on the *Indications* link located next to the *Tasks* link to view all available indications.

2 Selecting an Indication

Once the available indications appear, you can choose one from the list and drag it to the plan of action under the desired task.

3 Indication Added to POA

Once the indication has been added, the only edits that can be made (after clicking on the blue arrow) are to the indication's title and description.
